Minimum System Requirements	
Getting Started	3-5
Current Features	6

Terms and conditions:

Thank you for choosing to download SIVA Voice assistant. By agreeing to install this software, you are agreeing to give SIVA Voice Assistant the following permissions:

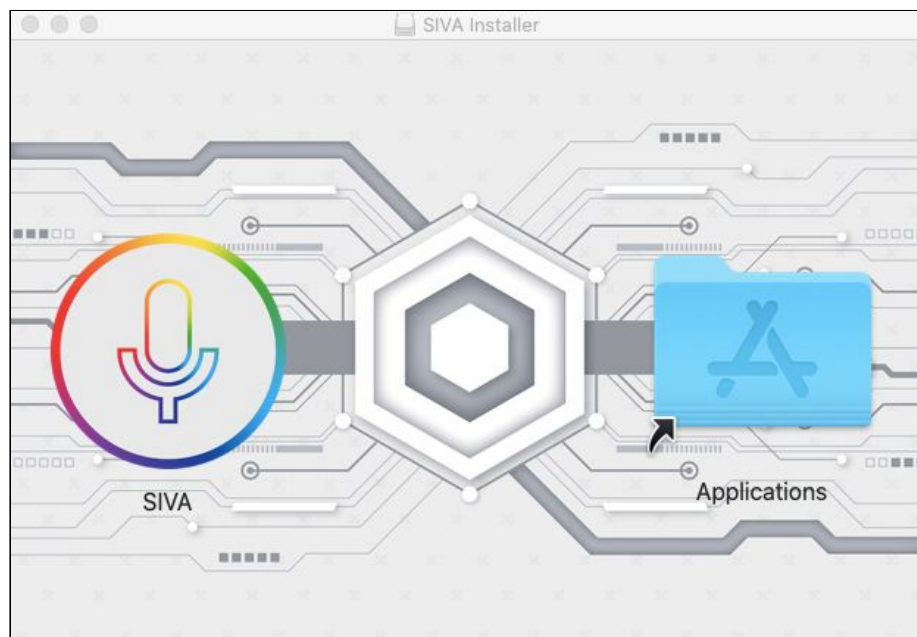

- Access to your microphone
- Access to your device's network
- Permission to view or change folders on your device

Minimum System Requirements:

- Processor: An Intel i5 or AMD equivalent
- Operating System: MacOS Catalina
- Disk: A hard drive or SSD with at least 45MB of storage
- Other components: A wifi card and stable network connection, preferably ethernet
- Peripherals: Working microphone, mouse/trackpad
 - Other requirements: A reasonably quiet environment

Getting Started:

1. Once you have downloaded the DMG file, double-click on it to open the installer. You should see a screen similar to this:

Then drag and drop the SIVA icon into the Applications folder on the right hand side. Once the application has been successfully copied and transferred you can then close the installer window and eject the virtual drive. SIVA is now installed and ready to open.

2. (Optional): You can select the speed of speech and the voice of SIVA by going into:

System Preferences → Accessibility → Speech

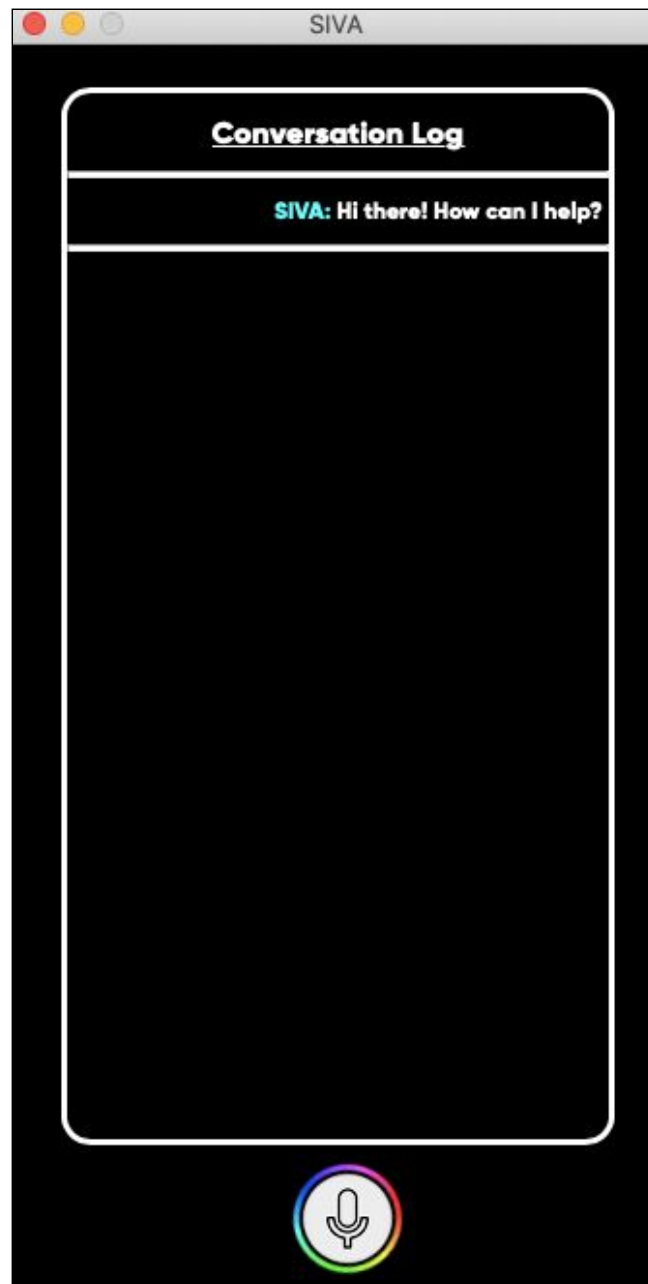

Best settings would be 'Siri Female (Australia)' with a speaking rate of 'Normal'.

3. Once the voice settings have been configured either to the recommended or your own liking you can open the app. Please note that you should open SIVA for the first time by going to:

Finder → Applications → SIVA

And then open SIVA by right clicking on the icon and then selecting open. Now you should see a screen like this come up after a few seconds-

Now you are ready to have SIVA help you with tasks in your day to day life!

*Please note that when pressing the button wait for about a second and then start speaking. This is to ensure that SIVA fully calibrates to better hear your voice every time.

Current Features:

The current features of SIVA include:

- Weather Reporting
- Google Search
- Youtube video player
- Word Definitions
- Joke Telling
- Tell Date and Time
